OSSTMM: 'How to test your Security in a Methodological way'

OPST Training: OSSTMM - Open Source System Testing Methodology Manual- Professional Security Testing Training

Just recently Outpost24 / Lab106 became an affiliate partner of ISECOM: www.isecom.org. As a result of this partnership Outpost24 / Lab106 is will start to offer OSSTMM trainings in the Benelux of which the kick off will be in September 2009.

The objective of all OSSTMM trainings is to learn 'How to test your security in a Methodological way' in other words Professional Ethical Hacking according the OSSTMM (Open Source Security Testing Methodology Manual). The courses will be given by Cor Rosielle (CISSP ISSAP OPST OPSA) who is one of the co-writers of the OSSTMM.

Path to enlightenment:

OPST: OSSTMM Professional Security Tester

OPSA: OSSTMM Professional Security Analyst

OPSE: OSSTMM Professional Security Expert

The first course that Lab106 will start giving is the OPST Training. After having obtained the OPST certificate people can enroll for the OPSA and OPSE trainings. (more detailed information about the OPST, OPSA and OPSE Trainings available at www.lab106.nl or visit: <http://isecom.org/certification/opst.shtml>).

To enroll for the OPST course please contact Outpost 24 Benelux / Lab106 on the following number: +31 20 420 9560 or sent an email to: info@lab106.nl

OPST Training details:

- * All trainings will be provided in either Dutch or English
- * Classes will hold no more then 6-8 people max
- * Duration of the OPST Training is four (4) days
- * Location t.b.d
- * Lunch included
- * Costs - 4,000.00 EUR including exams

OPST course dates 2009:

Block 1: 14-17 September 2009

Block 2: 14-17 December 2009

OPST Course dates 2010:

Block 1: 22 February-25 February

Block 2: 17 May-20 May

Block 3: 19 July-22 July

Block 4: 27 September-30 September

Block 5: 6 December-9 December

OSSTMM Professional Security Tester

The OPST is a certification of applied knowledge designed to improve the work done as a professional security tester. This is an important certification for those who want or need to prove they can walk the walk in security testing, the discipline which covers network auditing, ethical hacking, web application testing, intranet application testing, and penetration testing. And it is a critical, eye-opening class for security auditors, network engineers, system and network administrators, developers, network architects, security analysts, and truly anyone who works in IT from systems to networks.
